PRESS RELEASE

RECENT SYSTEM OUTAGES

The Electricity Company of Ghana wishes to inform the general public, especially its cherished customers that it has taken notice of the recent system shutdowns emanating from the challenges faced by Gridco, our National Interconnection Transmission System Operator, resulting in widespread outages within our operational areas in the Southern Zone of Ghana.

ECG is working closely with Gridco to restore power to all our customers. We hereby apologise for all the inconveniences caused and wish to assure all stakeholders that the company is resolved in carrying out its mandate of distributing safe, quality and reliable power supply.

Customers experiencing prolonged outages within their localities or individual premises should kindly call our contact centre on 0302 611611, report to the nearest ECG office or reach us on our social media handles; @ECGghOfficial.

Once again, ECG apologises for the inconveniences caused by the system outages.
END.

Kwame Agyeman-Budu
Managing Director
